ABOUT:

I'm a passionate .NET and Frontend Developer who loves turning ideas into interactive and efficient web applications. Skilled in C#, ASP.NET Core/MVC, HTML, CSS, JavaScript, SQL Server, and MySQL, I focus on writing clean, maintainable code and creating user-friendly experiences. I enjoy solving problems, learning new technologies, and building solutions that bring real value to people and businesses.

EDUCATION:

BS Computer Science – Virtual University of Pakistan *(2024 – 2028, Ongoing)*
Focusing on OOP, Data Structures, Web Development, and Databases.

Higher Diploma in Software Engineering (ACCP-Prime 2.0) – Aptech Learning Pakistan *(2023 – 2027, Ongoing)*
Practical training in full-stack development with hands-on projects in PHP, C#, MySQL, and JavaScript.

SKILLS:

• Frontend: HTML, CSS, JavaScript

• Backend: C#, ASP.NET Core / MVC

• Databases: SQL Server (MSSQL), MySQL

PERSONAL PROJECTS:

SRS Electrical Appliances: https://github.com/Hishaq00/SRSElectronics

A PHP/MySQL workflow system that manages product testing, quality checks, and rework between manufacturers and testers. Designed with a role-based interface to improve efficiency and coordination.

Nature Canvas: https://github.com/Hishaq00/NatureCanvas

An educational web project built with HTML, CSS, and JavaScript, showcasing Pakistan's national parks. Integrated a weather API to provide real-time conditions for a more engaging user experience.

ABCD-Mall: https://github.com/Hishaq00/ABCD-Mall

A .NET MVC application with Admin and Client roles. Features include shop & food court management, galleries, feedback system, and online movie ticket booking with seat availability. Built to provide a modern and user-friendly mall experience.
